Rousseau: The Company

For more than 60 years, Rousseau Metal inc. has been producing innovative, durable and superior quality storage solutions for a variety of different industries, such as: distribution, warehousing, manufacturing, automotive, mining, agriculture and small engine equipment, medical as well as government and institutional. In order to offer our clientele the best products that we can, our products are mainly designed and fabricated in North America. This allows us greater control over the quality of the materials we use in addition to ensuring excellent expertise in design and engineering.

At Rousseau, understanding your needs, creating and improving are daily objectives. Being totally committed to you is one of our fundamental values. We are prepared to expend as much energy as it takes to support you in your projects and ensure your entire satisfaction. At Rousseau, the entire team works with you and for you. Whether you distribute Rousseau products or are the final user, you can count on rapid, courteous and efficient services. Don't hesitate to contact us:

New items for 2013

"5S" Wall Panels

Rousseau is proud to present its new "5S" Wall Panel System. This is the only system that allows you to organize, on the same surface, a wide variety of articles, with very different shapes, sizes and weights, with a dedicated place for each to ensure visual identification (not permanent).

It is possible to combine light hooks (for small and/or light items), robust hooks (for heavy and/or bulky items), supports for cans and supports for plastic bins. With these accessories, you can maximize the space available.

- Completely flat surface that makes visual identification easy, with photos, p-touch, stickers or WM91 film;
- The panels overlap so they can be anchored in the same attachment zones and the hardware is installed between two panels, making them very quick to install;
- Panels can be installed vertically, in keeping with the architectural standard, with uprights measuring 16" c/c;
- Accessories can be installed quickly and easily, using hooks;
- Choice of 18 standard colours (for panels and accessories) to make your "5S" management easier, using colors.

Discover this new system of wall panels (pp. 130-131)!

New Dimensions for WM Frame for 72" W Workstations

In order to give you even greater flexibility in configuring your workstations, Rousseau has developed WM11 frame in lengths of 34" and 68". With these new, larger sizes, you can install accessories of various dimensions above the work surface. They are a perfect fit for the 72" W surfaces.

We invite you to look at the new sizes offered on pages 117 to 122.

18 Standard Colors!

When it comes time to choose a storage solution, the quality, the options and the configuration possibilities are essential features. This choice becomes even more interesting when you realize that it is possible to choose from a range of 18 standard colors, for the same price and the same delivery time. Be as creative as you want and combine various colors to create the environment of your choosing!
